

Which weights each rule keeps

One block of 32 weights (rows, the pruning direction) × 12 output columns · white lines = group boundaries

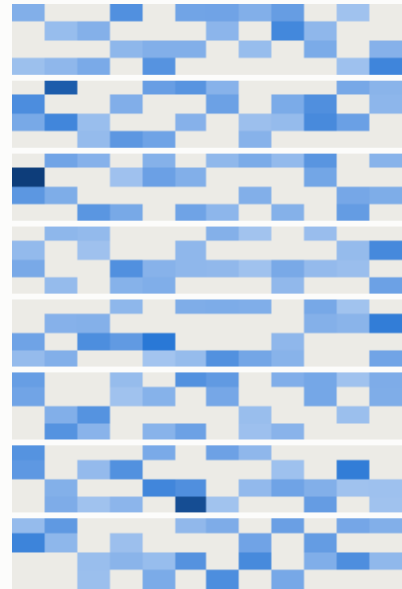

■ kept (darker = bigger weight) ■ pruned to zero

Paired 4:8 (NVIDIA)

keeps 87% of the weights' size

2:4

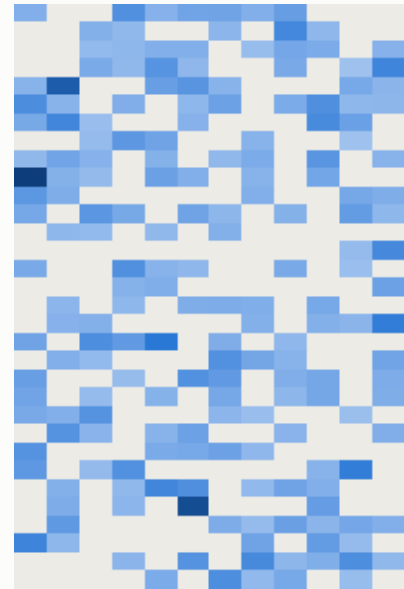

keeps 91% of the weights' size

4:8 (ours)

keeps 94% of the weights' size

No pattern (best possible)

keeps 96% of the weights' size
